How to administer DEC and Albendazole drugs:

1. Determine the age of the person to whom the drugs will be given.
2. Refer to the front of this card for the correct dosage of each drug.
3. Make sure that the person has a full stomach 2 hours before intake of the drugs.
4. Administer albendazole to each person. For children, instruct her/him to chew the tablet, then check for discoloration of the tongue.
5. Administer correct number of DEC tablets and instruct him/her to take one tablet at a time (for ages 13 and above). For children, check mouth to ensure that tablets have been swallowed.
6. Record treatment correctly.
7. Inform the person on what to do in case of the following symptoms.
   - Abdominal pain
   - Headache
   - Dizziness
   - Fever
   - Vomiting
   - Joint/ Muscle pain
   - Diarrhea
   - Nausea
   - Fatigue
   - Rashes
   - Presence of nodules
8. If symptoms persist for 24 hours or more, consult at your nearest health center.
